

Staff Illness Protocol:

Administrative staff will assess and determine if a staff is showing signs of illness by following the guidelines list below.

- Fever- Greater than 101°F. The participant can return to camp after he/she has been fever-free for 24 hours (without fever-reducing medicine such as Tylenol or Motrin).
- Vomiting-While at camp or during the night. The participant can return to camp only after being symptom free for 24 hours.
- Diarrhea- If the staff member has had three or more watery stools during camp or in a 24-hour period, the participant should be kept home.
- Cough or congestion: The participant should remain home if the cough or congestion interferes with breathing and/or if wheezing.
- Conjunctivitis (pinkeye): Following a diagnosis of bacterial conjunctivitis, the participant may return to camp 24 hours after antibiotic treatment is started. Staff with viral infection may return when eyes are clear.
- Head lice: Staff may return to camp, only after treatment and when hair is free of nits.

A reclining chair is available in the wellness rooms for staff who must be kept isolated or is feeling ill.
